CO2: To familiarize the students with psychometric theory and principles of test construction.

EP 103: Statistical Methods

CO1: To acquaint the students and make them understand the different statistical methods with their uses and interpretations,
CO2: To develop computational skills in students,
CO3: To enable them to analyze the data of practical and project work.

EP 104: Psychology Practical - Tests

CO1: To understand the administration of psychological tests, interpretation of scores and report writing
CO2: To know the evaluation procedures and evaluation of psychological tests,
CO3: To adapt certain skills of psychological counseling on the basis of psychological test results.

EP 201: Learning And Memory

CO1: To know various types, models and theories of learning and memory,
CO2: To understand the neurological basis of learning and memory,
CO3: To understand the applications of the principles of learning and memory.

EP 202: Psychological Testing: Applications

CO1: To understand the various psychological assessment techniques

CO2: To get acquainted with the application of psychological tests in different fields.

EP 203: Research Methodology

CO1: To understand the basic research concepts and Steps in research process,

CO2: To know the basic terminology of advanced research techniques so that they can follow the research reports and papers in different branches of psychology,

CO4: To get acquainted with some commonly used research designs and the APA style of preparing research proposal and writing research report.

EP 204: Psychology Practical: Experiments

CO1: To know the different areas of experimentation in psychology,

CO2: To adapt various skills of conducting experiments in psychology and report writing style

CO3: To understand the applications of experimental design.

EP 301: Personality

CO1: To provide the students with a comprehensive, rigorous and systematic treatment of centrally important theories of personality.

CO2: To allow the students to observe and interpret individual differences in behavior in the light of sound theoretical systems of personality.

CO3: To acquaint the students with the applications of personality theories in different walks of life.

EP 310: Psychopathology-I

CO1: To familiarize with the latest DSM-5 classification system of Mental Disorders

CO2: To know various paradigms of Psychopathology

CO3: To understand the symptoms and prognosis of different Mental Disorders

EP 311: Psycho diagnostics: Procedure And Techniques

CO1: To learn various Psycho-diagnostics, procedure & techniques

CO2: To get acquainted the different Psycho-diagnostic tools to be used & skills to be acquired.

EP 312: Project

CO1: To able to conduct research in social settings with maladapted group.

CO2: To able to write research in APA style.

CO3: To able to present the research paper effectively and appropriately.

EP 401: Motivation and Emotion

CO1: To provide comprehensive overview of the major theories of motivation and emotion

CO2: To create awareness about the role of biological factors in motivation and emotion.

CO3: To emphasize the importance of positive and negative emotions in human life.

EP 410: Psychopathology-II

CO1: To familiarize Latest DSM-5 classification system of Mental Disorders

CO2: To know various paradigms of Psychopathology

CO3: To understand the symptoms and prognosis of different Mental Disorders.

EP411: Psychotherapies

CO1: To know various Psychotherapies and its basic procedure

CO2: To understand the effectiveness of specific psychotherapy in solution of particular problem.

CO3: To be able to use different psychotherapeutic skills.

EP412: Practicum

CO1: To acquire the necessary skills for working with psychologically disturbed people.

CO2: To be able to work with mental health professionals.
